INDICE

M. Berger – Dynamiser la géométrie élémentaire : introduction à des travaux de Richard Schwartz . . . . . pag. 1

P. J. Cameron – Finite Geometry and Permutation Groups: Some Polynomial Links . . . . . » 25

D. Ghinelli – D. Jungnickel – Some Geometric Aspects of Finite Abelian Groups . . . . . » 37

J. W. P. Hirschfeld – The Number of Points on a Curve, and Applications Arcs and Curves: the Legacy of Beniamino Segre . . . . » 75

G. Korchmáros – Segre-Type Theorems in Finite Geometry. . . . . » 89

Y. I. Manin – Manifolds with Multiplication on the Tangent Sheaf. . . . » 113

J. A. Thas – Finite Geometries: Classical Problems and Recent Developments . . . . . » 129

G. Thorbergsson – Transformation Groups and Submanifold Geometry » 141

G. Tomassini – Extension Problems in Complex Analysis . . . . . » 155

E. Vesentini – Beniamino Segre and Italian Geometry . . . . . » 165

J. Zaks – The Rational Analogue of the Beckman-Quarles Theorem and the Rational Realization of Some Sets in E^d . . . . . » 175

J. Zaks – Short Note – Rationally realizing sets, five years later . . . . . » 183
