

INDICE

<i>Premessa</i>	Pag. 1
-----------------------	--------

CONVEGNO

LA FIGURA E L'OPERA DI GIUSEPPE DE NOTARIS (1805-1877)

GRANITI A. e PEDROTTI F. - Introduzione	» 7
GRANITI A. - Giuseppe De Notaris, botanico e pioniere della «Crittogamologia» italiana	» 9
TOSCO U. - L'attività di Giuseppe De Notaris a Torino	» 37
MAROTTI M.G. - L'attività di Giuseppe De Notaris a Genova	» 41
LANZARA P. - Giuseppe De Notaris a Roma	» 53
MAROTTI M.G. - L'opera di Giuseppe De Notaris nello studio delle piante vascolari	» 63
CORTINI PEDROTTI C. - L'opera botanica di Giuseppe De Notaris: i Muschi	» 75
GEISSLER P. e NATALI A. - L'opera epaticologica di Giuseppe De Notaris	» 87
MONTEMARTINI CORTE A. e GRANITI A. - L'opera micologica di Giuseppe De Notaris (1805-1877)	» 97
GRANITI A. e CICCARONE C. - La seconda centuria degli «Sferiacei italiani» di G. De Notaris	» 113
NIMES P.L. e BARTOLI A. - Il ruolo di G. De Notaris nella storia della Lichenologia	» 123
BAZZICHELLI G. e ABDELAHAD N. - Giuseppe De Notaris: algologo del tempo libero	» 135

GRANTI A. - La raccolta di ritratti fotografici di Botanici dell'800 di Giuseppe De Notaris (1805-1877)	Pag. 201
SOLDANO A. - La fine di una grande amicizia: la rottura di Giuseppe De Notaris con Vincenzo Cesati	» 225

Appendice

PEDBOTTI F. e GRANTI A. - Trobaso conserva le memorie di Giuseppe De Notaris	» 233
— Alcuni riferimenti biografici e notizie su G. De Notaris	» 237

CONVEGNO

ASPETTI CHIMICI E FISIOLGICI DELLE FITOTOSSINE

(ABSTRACTS)

Introduzione	» 245
ABBATANTUONO I. and SPARAPANO L. - Effects of Some <i>Sciridium</i> Toxins on Three Cypress Species	» 247
ABRUZZESE A., ALISI C., MORGUTTI S. and COCUCI S.M. - A Possible Effect of FC on the Permeability of the Plasmalemma to Water	» 247
ADUCCI P., BALLIO A., FOGLIANO V., FULLONE M.R., MASRA M. and VERZILI D. - Fusicoccin Receptor: Monomeric or Multimeric Protein?	» 248
ALTOMARE C., BOTTALICO A., CAPASO R., EVIDENTE A., LOGGICO A., MORETTI A., MELE G. and RANDAZZO G. - Production of Enriatin B by <i>Fusarium avenaceum</i> and its Toxicity to <i>Artemia salina</i> L.	» 249
ARAGONA M., PORTA-PUGLIA A., GATTI A. and VANNACCI G. - Toxic Metabolites of <i>Pyrenophora graminea</i>	» 249
ARNONE A., ASSANTE G., MERLINI L. and NASINI G. - Recent Results on Perylenequinones from Phytopathogenic Strains: the Cladochromes	» 250
BALLO A. - Metabolites of the Plant Pathogen <i>Pseudomonas syringae</i> pv. <i>syringae</i>	» 251
BALLO A., EVIDENTE A., GRANTI A., RANDAZZO G. and SPARAPANO L. - Further Studies on Minor Toxins Produced by Three Species of <i>Sciridium</i> in Culture	» 252

CACCIOLA S.O., PANE A., PARESI A., TRENGALI C. and PINNISI A. — Growth Curves of <i>Phoma tracheiphila</i> (Petri) Kanc. et Gik. on Liquid Media and Toxicity of Culture Fluids	Pag. 253
CAPASSO R., CRISTINZO G., EVIDENTE A. and RANDAZZO G. — On the Phytotoxin from Culture Filtrates of <i>Phytophthora nicotianae</i>	» 253
CERANA R., COLOMBO R. and LADO P. — Effect of Fusaric Acid on the Vacuolar Membrane	» 254
COCCOCI M. and NEGRINI N. — Biosynthetic Activities are not Involved in Germination and Metabolic Seed Reactivation Promoted by Fusicoccin	» 255
COLLINA A., PACI M., SEGRE A.L. and BALLIO A. — Structure Determination of Syringotoxin by 1D and 2D NMR.	» 256
DE LORENZO G., SALVI G., TOURBIAT P. and CERFONE F. — Phytotoxic Effects of Microbial Pectic Enzymes	» 256
DE MICHELIS M., OLIVARI C., PUGLIARELLO M.C. and RASI-CALDOGNO F. — Activation of the Plasma Membrane H ⁺ -ATPase by Fusicoccin	» 257
EVIDENTE A., IACOBELLIS N.S., IMPELLIZZERI A., LAVERMICOGGA P. and SURICO G. — Characterization of Three Phytotoxic Compounds from <i>Pseudomonas syringae</i> pv. <i>populans</i>	» 258
FANELLI C., FARRI A.A., CASTORIA R. and PASSI S. — Relationship between Lipid Metabolism and Phytoalexin Production in Potato Tubers after <i>Phytophthora infestans</i> infection	» 259
GIGURINA I., BARCA A., CERVIGNI S., PUCCI P. and BALLIO A. — Brominated Metabolites of <i>Pseudomonas syringae</i> pv. <i>syringae</i>	» 260
IACOBELLIS N.S. and LAVERMICOGGA P. — Preliminary Results on the Presence of Syringomycinlike Substances in Bean Tissues Infected by <i>Pseudomonas syringae</i> pv. <i>syringae</i>	» 260
IACOBELLIS N.S., MOREA M., PALUMBO G., SISTO A. and CIRIACO C. — Genetic Aspects of Cytokinins Production in <i>Pseudomonas amygdali</i>	» 261
KOHIMOTO K. — Recent Progress in Toxin Research on <i>Alternaria</i> and other Fungi in Japan	» 262
MARRA M., COZZELLA M.L., DI GEORGIO D. and ADOCCI P. — Reassessment of <i>Cercospora beticola</i> Toxin (CBT) Effects on <i>in vivo</i> and <i>in vitro</i> Activities of Fusicoccin	» 263
MARRÉ M.T. and ALBERGONI F.G. — Effects of Fusaric Acid in <i>Eloëa densa</i> Leaves	» 264

MOSCONI C. and CRISO P. - Reaction of <i>Cicer Arietinum</i> to Culture Filtrate of <i>Ascochyta blight</i>	Page 265
NATOLI M., PETRONE G., CACCIOLA S.O. and PANE A. - Characterization and Phytotoxic Activity of Pectic Enzymes Produced by <i>Phoma tracheiphila</i> (Petri) Kanc. et Gik.	» 265
PIRO G., MONTEFUSCO A. and DALESSANDRO G. - D-glucosamine and N-acetyl-D-glucosamine Metabolism During Elongation Growth Induced by Fusicoccin in Avena Coleoptile Segments	» 266
POMARICI R.L., ABBATANUONO I. and GRANITI A. - Abnormal Growth of Lettuce and Pepper Seedlings Treated with Monodeacetyl-fusicoccin	» 267
RADICE M. and PESCI P. - Effect of Fusaric Acid and its Structural Analog Picolinic Acid on the Release of Substances from Barley Leaf Segments and Red Beet Root Disks	» 268
SACCHI G.A., MORGUTTI S., COCUCI M. and COCUCI S. - Calcium Involvement in the Inhibiting Action of Ophiobolin a in the Early Phases of Radish Seed Germination	» 268
SOMYE C. and MARRE E. - Strategies for Selecting <i>Arabidopsis thaliana</i> Mutants Resistant to Fusicoccin	» 269
SPARAPANO L. and DURBIN R.D. - Effect of Sciridins and Cyclopaldic Acid on Tobacco Protoplasts	» 270
SPARAPANO L., EVIDENTE A. and GRANITI A. - Cyclopaldic Acid Production by Two Strains of <i>Sciridium cupressi</i>	» 271
SPARAPANO L., FRISULLO S., TANESE G. and GRANITI A. - Analysis of Local Populations of <i>Fusicoccum amygdali</i> from Peach and Almond for Production of Fusicoccins	» 272
SPARAPANO L., IMPELLIZZERI A. and GRANITI A. - Toxin Production in culture by Three Strains of <i>Sciridium unicomae</i>	» 272
TROCKNER V., FAZIO R. and MARRE E. - Respiratory Effects of Fusicoccin in Conditions of Inhibited H ⁺ Extrusion	» 273
VAN DER ESCH S.A., MACCHIONI O. and PANFILI G. - Production of 6-Methoxymellein in Plant Tissue Culture of <i>Dryucus carota</i> ...	» 273
VUKRO M., BOTTALICO A., ZONNO M., EVIDENTE A., CAPASSO R., RANDAZZO G. and RITENI A. - Production of Cytochalasins by <i>Phoma exigua</i> var. <i>heteromorpha</i>	» 274
Conclusioni	» 277

MEMORIE

PICASSO E. - Una finestra sul tempo: il grande anello di collisione di elettroni e positroni del CERN di Ginevra	Pag. 281
LEPSCHEV A. - L'informazione, una idea-guida del nostro secolo	» 295

ANNALI

<i>Annali 1990-1991 a cura di C. FURLANI</i>	» 321
