

## INDICE

---

M. BIROLI – Luigi Amerio . . . . .	pag.	1
A. AMBROSETTI – A. MALCHIODI – D. RUIZ – Recent Trends on Nonlinear Elliptic Equations on $\mathbb{R}^n$ . . . . .	»	3
L. AMBROSIO – Flussi gradiente in spazi metrici e nello spazio di Wasserstein delle misure di probabilità . . . . .	»	15
B. BASIT – H. GÜNZLER – Harmonic Analysis for Generalized Vector Valued Almost Periodic and Ergodic Distributions . . . . .	»	35
M. BIROLI – Nonlinear p-Homogeneous Dirichlet Forms on Non-reflexive Banach Spaces . . . . .	»	55
C. BOTTERO – T. COLLINI – G. PROUSE – On a Mathematical Model Relative to the Doping of Semiconductors. . . . .	»	79
L. CAFFARELLI – KI-AHM LEE – Homogenization of Nonvariational Viscosity Solutions . . . . .	»	89
G. CARDONE – S. E. PASTUKHOVA – V. V. ZHIKOV – Some Estimates for Non-Linear Homogenization . . . . .	»	101
C. CERCIGNANI – Existence Theory for the Boltzmann Equation . . . . .	»	111
V. V. CHEPYZHOV – M. I. VISHIK – Global Attractors for Non-Autonomous Ginzburg–Landau Equation with Singularly Oscillating Terms . . . . .	»	123
M. CHICCO – Harnack Inequality for Solutions of Mixed Boundary Value Problems Containing Boundary Terms . . . . .	»	149
A. CIALDEA – A. MALASPINA – Completeness Theorems for the Dirichlet Problem for the Polyharmonic Equation. . . . .	»	153
G. GEYMONAT – F. KRASUCKI – Some Remarks on the Compatibility Conditions in Elasticity. . . . .	»	175
M. GIAQUINTA – D. MUCCI – $W^{1/2}$ -Maps into $S^1$ and Currents . . . . .	»	183
A. HARAUX – On the Double Well Duffing Equation with a Small Bounded Forcing Term . . . . .	»	207
C. E. KENIG – Some Recent Quantitative Unique Continuation Theorems . . . . .	»	231
E. LANCONELLI – A Polynomial one-side Liouville Theorem for a Class of Real Second Order Hypoelliptic Operators. . . . .	»	243
YANYAN LI – L. NIRENBERG – Regularity of the Distance Function to the Boundary. . . . .	»	257
P.-L. LIONS – Lattices and Mean Energy . . . . .	»	265
E. MAGENES – Sulla regolarità della soluzione di un problema ai limiti per una equazione integro-differenziale parabolica. . . . .	»	271
M. MIRANDA – Sulle singolarità eliminabili delle soluzioni dell’equazione delle superfici minime . . . . .	»	281

U. MOSCO – Measure-Valued Lagrangians . . . . .	pag.	287
B. PERTHAME – The General Relative Entropy Principle – Applications in Perron-Frobenius and Floquet Theories and a Parabolic System for Biomotors – . . . . .	»	307
F. RICCI – Uncertainty Inequalities on Spaces with Polynomial Volume Growth . . . . .	»	327
C. SBORDONE – Sharp Embeddings for Classes of Weights and Appli- cations . . . . .	»	339
V. A. SOLONNIKOV – Schauder Estimates for the Evolution Generalized Stokes Problem in Exterior Domains . . . . .	»	355
G. TALENTI – A Mathematical Model of Some Gas Emitting Volcanic Systems . . . . .	»	379
L. TARTAR – Compensation Effects in Partial Differential Equations . . .	»	395
E. VESENTINI – Periodic and Almost Periodic Linear Isometries of Hardy Spaces . . . . .	»	455
